

CROSSFIT ONLINE COURSES

SUPPLEMENTAL INFORMATION FOR PHYSICIANS

CME MISSION STATEMENT

CrossFit, LLC is dedicated to equipping healthcare providers with the skills, strategies, and support they need to counsel patients and prescribe exercise and nutrition as viable means of improving health. The CrossFit CME Program aims to develop a global team of practitioners who impact patient outcomes both by improving health and increasing patient engagement on the path to better health.

Physicians will demonstrate increased competence in applying the fitness and nutrition knowledge they acquire, synthesizing it into relevant and actionable information their patients can use to reduce the symptoms of chronic disease. Patients will experience improved health over time as a result of engaging in the process of utilizing lifestyle changes (e.g., fitness and nutrition).

ONLINE COURSES APPROVED FOR CME

The CrossFit Training department offers a variety of online courses available to physicians who want to improve their ability to incorporate fitness and nutrition into care plans for their patients.
